-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

***Claim Rejections - 35 USC § 103***

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Parent et al. in view of Spehar et al.

Parent et al. shows a catch plate having a yoke 65; inserts 10 that can be of different shapes and sizes as noted in column 4, lines 34-45; cradle sections seen in Figure 1 that engage the nozzle; C-shape discussed in column 4, lines 29-31 (and U-shaped as the perspective changes as the dispenser is looked at from different angles); and the peripheral track is the edge of 10. Parent et al. lacks the dual cartridges and the tongue/groove track. Spehar et al. shows dual cartridges 15, 16 and a tongue/groove track 32, 36. It would have been obvious to one of ordinary skill in the art to provide the dual cartridges and the corresponding securing device as taught by Spehar et al. on the device of Parent et al. in order to dispense products that should not be mixed until time of dispensing (i.e. multi-component adhesives that cure when mixed).

***Allowable Subject Matter***

3. Claim 6 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

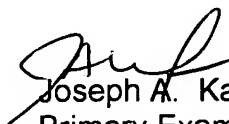

**Conclusion**

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Keller, Zinger and Horth et al. show other yokes for dispensing cartridges; and Simpson shows an adjustable nozzle device.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Joseph A. Kaufman whose telephone number is (571) 272-4928. The examiner can normally be reached on Monday-Thursday, 5:30AM-2PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael Mar can be reached on (571) 272-4906. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
